방법1. IDE 혹은 GitHub Repo 에서 Cloud Agent 에게 요청

4. GitHub Repo 의 Agents 탭에서 수행중인 작업 확인

The screenshot displays the GitHub Agents interface for the repository `hijigoo / dev-agent-workflow`. The top navigation bar includes links for Code, Issues (3), Pull requests (2), Agents, Actions, Projects, Wiki, Security and quality, Insights, and Settings. The left sidebar shows filters for 'Created by me', 'Needs attention', and 'All sessions'. The main content area is titled 'Sessions' and features a text input field with the placeholder 'Give Copilot a background task to work on'. Below this is a 'Get started with agents' section with three cards: 'Explain repository' (Let the agent help you understand the codebase), 'Improve my workflow' (Get tips based on my recent sessions), and 'Create a plan' (Plan before making changes to the codebase). A search bar shows the query 'is:open author:@me'. A table lists sessions with columns for Status, Type, Agent, and Newest. The first session, 'Enhancing code readability with comments', is highlighted by an orange box. It was started by hijigoo 1 minute ago. The second session, 'Explaining workflows or action processes', was started 3 weeks ago. The third session, 'Exploring copilot-setup-steps workflow utilization', was completed 3 weeks ago.

Status	Type	Agent	Newest
Active	3	Completed	4

🔍	Explaining workflows or action processes	hijigoo · Started 3 weeks ago	☁️ 🌀 ⋮
✓	Exploring copilot-setup-steps workflow utilization	hijigoo · Completed 3 weeks ago	☁️ 🌀 ⋮

방법1. IDE 혹은 GitHub Repo 에서 Cloud Agent 에게 요청

5. IDE 와 GitHub Repo 에서 모두 확인 / Checkout 혹은 PR 생성하여 코드 머지

방법2. Repo 에서 이슈를 생성할 때 Assignee 를 Copilot 으로 할당 사용할 수 있습니다.

1. GitHub Repo 의 Issue 탭에서 이슈 생성

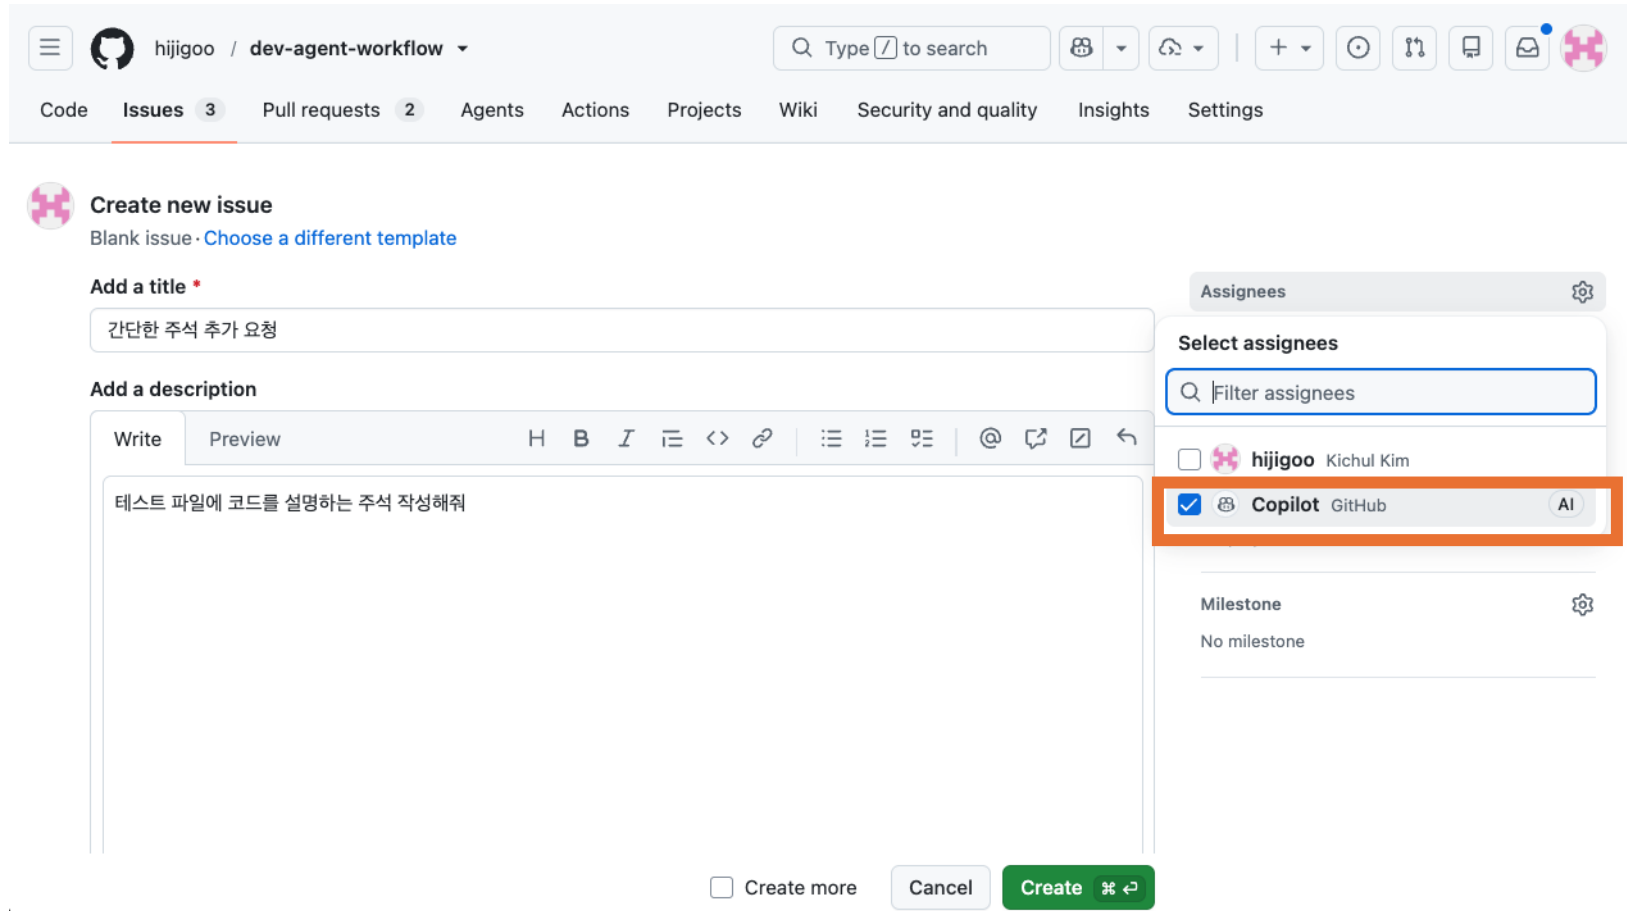

The screenshot shows the GitHub interface for the repository 'hijigoo / dev-agent-workflow'. The 'Issues' tab is selected, showing 3 issues. The 'New issue' button is highlighted with an orange box. The left sidebar contains filters for 'Assigned to me', 'Created by me', 'Mentioned', and 'Recent activity'. The main content area shows a list of issues with filters for 'Open' (3) and 'Closed' (4). The issues listed are:

- [보안] demo/manual-codeql-alert CodeQL 경고 조치 (agent-ready, security) - #23 · github-actions opened 2w ago
- [E2E] demo/manual-e2e-failure 프로젝트 회귀 조치 (agent-ready, quality-regression) - #22 · github-actions opened 2w ago
- [업그레이드] FastAPI-React 최신 stable 반영 (agent-ready, enhancement) - #21 · github-actions opened 2w ago

At the bottom, there is a 'Feedback' button and a 'Preview' button.

방법2. Repo 에서 이슈를 생성할 때 Assignee 를 Copilot 으로 할당 사용할 수 있습니다.

2. Issue 생성시 Assignee 를 Copilot 으로 선택

The screenshot shows the GitHub 'Create new issue' page for the repository 'hijigoo / dev-agent-workflow'. The 'Issues' tab is active, showing 3 issues. The 'Add a title' field contains '간단한 주석 추가 요청' and the 'Add a description' field contains '테스트 파일에 코드를 설명하는 주석 작성해줘'. The 'Assignees' dropdown menu is open, showing a search bar 'Filter assignees' and two options: 'hijigoo Kichul Kim' and 'Copilot GitHub'. The 'Copilot GitHub' option is selected and highlighted with an orange border. The 'Milestone' dropdown menu is also open, showing 'No milestone'.

4. 작업이 완료 ([WIP] 사라짐) 되면 리뷰 후 머지, 혹은 추가 요청

The screenshot shows a GitHub pull request interface for a repository named 'hijigoo / dev-agent-workflow'. The pull request is titled 'Add explanatory comments to API tests #25' and is in a 'Draft' state. The pull request is created by 'hijigoo' using 'Copilot' and wants to merge 2 commits into 'main' from 'copilot/add-comments-to-test-file'. The pull request has 4 files changed, 2 commits, and 0 checks. The pull request is reviewed by 'hijigoo' and 'Copilot'. The pull request is assigned to 'hijigoo' and 'Copilot'. The pull request has no labels, projects, milestones, or development status.

Add explanatory comments to API tests #25

Draft hijigoo with Copilot wants to merge 2 commits into `main` from `copilot/add-comments-to-test-file`

Conversation 0 Commits 2 Checks 0 Files changed 1 +4

Copilot AI commented 3 minutes ago • edited Contributor

Trigger

Test files needed concise comments explaining non-obvious setup and edge-case coverage.

Change

- Added comments for API test isolation via per-test SQLite databases.
- Documented the shared reservation payload helper.
- Clarified half-open interval adjacency coverage.
- Clarified aggregate-only quality metrics coverage.

Acceptance criteria

- ☒ The requested behavior is implemented.
- ☒ Excluded scope was not changed.
- ☒ User-visible and operational errors are explicit.
